Efficiency and Choice

DIEGO ELITE — the Olympus Rhinology Shaver System
The DIEGO ELITE Multidebrider is a multipurpose ENT shaver system designed to offer surgeons improved choice on how to perform surgeries while at the same time offering features aimed at improving surgical efficiency.

**Full System Overview**

- **Disposable blade/burr**
- **Energy blades for intraoperative hemostasis**
- **Irrigation**
- **Suction**
- **Touchscreen Console**
  - Intuitive and simple handling.
  - Blade ID recognition with predefined optimal setting.
  - Dedicated suction unit.
- **Reusable Handpieces**
  - Straight and angled option.
  - Comfortable and ergonomic handling.
  - Open design for safer cleaning. Autoclavable.
- **Suction Tubing**
  - Completely disposable suction pathway.
  - Declog suction tubing for immediate cleaning of clogged blades.
- **Toggle Stop**
  - Improved efficiency and safety. One touch to have the blade’s window fully open/closed, avoiding undesired tissue engagement or having a suction in your hand.

**Image-guided surgery integration**

- **Declog pressure bulb for immediate cleaning of clogged blades**
- **Normal suction pathway**
- **Air pressure pathway**

**Disposable tube set**
The DIEGO ELITE Multidebrider offers the surgeon multiple ways to perform surgery, including a choice of two handle types, comprehensive portfolios of blades and burrs as well as the possibility to choose between standard or declog tube set.

**Blade Portfolio**

- **Standard Blades**
  - Standard soft tissue removal in the nasal anatomy.

- **Type A Blades**
  - For advanced resection.

- **Energy Blades**
  - Bipolar and monopolar energy blades for immediate hemostasis during surgery.

- **Angled Blades**
  - A variety of angles including 0°, 15°, 60°, 75° and 90°.

- **Rotatable Tip Blades**
  - Allows the surgeon to reach different areas of the nasal anatomy without twisting the handpiece.

- **Turbinate Blades**
  - 2 mm turbinate blades for submucosal resection also available with bipolar option.

**Burr Portfolio**

- **Diamond Bullet Burr**
  - Diamond bullet burr portfolio for gentle removal of bone and cartilage structures. Available in different angulations.

- **Diamond Ball Burr**
  - Diamond removal of delicate bone and cartilage structures. Available in different angulations.

- **Angled Burrs**
  - Full burr portfolio available in a variety of angles including 15°, 60° and 70°.

**Beyond Functional Endoscopic Sinus Surgery (FESS)**

- **Tonsil and Adenoid Blades**
  - A wide range of blades are available for tonsil and adenoid resection. Malleable, bipolar and monopolar blades for cauterization and stabilization of the adenoid bed.

- **Laryngeal Blades**
  - For the removal of laryngeal lesions and tumor debulking. Available as 2.9 mm and 4 mm with a length of 22 cm for subglottic / upper tracheal area or 27 cm for glottic / supraglottic applications.
